

EATON TIMBER PRODUCTS - Spring 2008

Welcome to the first Eaton Timber Products Newsletter of 2008 and a slightly belated Happy New Year.

We thought 2007 was a busy year but 2008 is proving to be even more hectic. Having a clear idea of what lay ahead we took the opportunity of the Christmas break to install a brand new beam saw to operate alongside our recently acquired edge bander and CNC machining centre.

We now have a factory that is very well equipped with modern machines offering great flexibility to produce standard items in volume, such as timber slatted shelves or bespoke products like the ETP timber work bench.

Please contact us for details of our products and find out what we can do for you. Call us on: **01905 455457**, email us at; sales@eaton-timber.co.uk or use the fax back form overleaf. Looking forward to hearing from you.

Managing Director - Eaton Timber Products

Out With The Old, In With The New

New Beam Saw Arrives

In December 2007 ETP took delivery of a new Scheer PA 5500 beam saw with optimising software. Scheer is a long established German manufacturer and produces robust and beautifully engineered machinery.

A beam saw, or more correctly, a beam panel saw is a travelling rise and fall cross-cut saw used to cut panel boards and similar sheet materials.

Still None The Wiser?

Well, it's expensive, it's big, it's fast, it cuts to an accuracy of 0.1mm, it's automatic and it is magnificent. Coventry based Ney, the UK agents for Scheer, took away our old saw, installed the replacement and completed commissioning all in the week before Christmas.

If you are passing through or near Worcester give me a call and come and see the saw in operation.

Wood Worm!

One of Eaton Timber Products great strengths is the ability to design and manufacture bespoke products. Recently, an organisation based in the North East of England approached ETP to ask whether we could produce interlocking stacks of trays for breeding earthworms.

The trays had to be robust and interchangeable, the wheels on the base units needed to be tough, strong, yet free running and the timber used in the construction had to be free of any preservatives or chemicals which could invade the worms' environment. Within five days, ETP's design team had come forward with a proposal for submission to the client.

A few minor alterations were suggested and incorporated and after only 15 days from the client's first contact with ETP a sample was supplied for approval. Approval led to manufacture and within eight weeks of the first contact with ETP 300 worm trays were delivered to the client.

ETP bespoke products

Please contact me directly (Alan Venables) on **07776 303396**, E-mail me at alan@eatontimber.co.uk or call **01905 455457** and ask for Cee.

New Team Member

I am very pleased to let you know that Celia Beesley joined the ETP team as Sales and Accounts Co-ordinator in January. Celia (or Cee as she prefers to be called) has a wealth of experience in customer service and will be responsible for taking orders, keeping customers updated, following-up leads and contacts, problem solving and offering solutions.

Cee can be contacted on 01905 455457 and will be delighted to hear from you.
